# What is Vibrational Medicine?

Vibrational medicine is “an evolving viewpoint of health and illness that takes into account the many forms and frequencies of vibrating energy (like atoms) that contribute to the multi-dimensional human energy system”.

Vibrational medicine is used to describe a variety of living remedies, and is based on the principle of healing using the living energy within something, such as crystals, plants, sunlight and food. Acupuncture, homeopathy, and sound therapy are also forms of vibrational medicine.

# What is a Medical Intuitive?

A Medical Intuitive Practitioner is a psychic or intuitive counselor who specializes in perceiving information concerning the human body. A Medical Intuitive can energetically read the insides (organs, glands, blood, etc.) of our bodies. The practitioner relies on their own unique knowledge base to successfully interpret what they see.

What we are teaching in this school helps to educate and broaden a practitioner's core knowledge while providing a logical structure for enhancing and strengthening their intuition about the body and energy systems.

# About Vibrational Gateways Institute

The school was originally founded in 1995 by a local chiropractor named Larry Herbig, DC. I graduated from his school in 1997 taking 9 months of coursework and a 6 month practicum program. Many years later we stayed connected and eventually became very good friends.

In 2016, Dr. Herbig very generously gave me all his training materials. His program was so in-depth and unique that I often commented that it was a shame that the school had closed when he retired in 2008.

After a lot of soul searching and seeing that there wasn't another school of this type in the region, I decided to begin teaching for the first time in 2018.

# The 9 Module Certification Program

I condensed the original material into a 9 month program running from March until December with 1 month off in September for more individual practice.

**Module 1:** Our Vibrational World (March)

**Module 2:** Energy Anatomy & Physiology (April)

**Module 3:** Dynamics of Health & Disease (May)

**Module 4:** Developing Subtle Energy Senses (June)

**Module 5:** Working with Energy Currents (July)

**Module 6:** Medical Intuitive Protocols (August)

Followed by the Practicum (October, November and December)

# My Teaching Philosophy & Mission

I designed this certification program not only to teach vibrational healing and certify medical intuitives but also to assist in the expansion of spiritual consciousness, self-awareness and to prompt self-care for healers. My focus while teaching is to help each student trust their inner wisdom or to further deepen the trust is already there.

I also seek to create and maintain a classroom that is culturally diverse, emotional supportive and accessible to anyone with a desire to learn. I offer several scholarship each year which discount tuition up to 90% for those who have limited means.

This certification program isn't just an educational experience, it takes you on a healing journey... as all of the soon to be graduating students will attest to.

# Just some of what students have learned...

- About the birth of Physics as a science and all the way to our more recent discoveries in Quantum Physics
- The various physical and energetic systems of the human body in-depth
- An in-depth working knowledge of what causes disruptions in the body's own healing wisdom and how to remedy it.
- How see auras and perceive subtle energies as well as the various ways to access divine wisdom like dowsing and many others.
- Endocrine Attunement and more than 35 other vibrational techniques to restore balance in the body.
- Use of the Full Body Scan, Routine Scan, and Food Scan chart systems to identify imbalances, food sensitivities and more.

The background features a complex, abstract design with flowing, wavy lines in shades of purple, blue, and yellow. Interspersed among these lines are numerous small, glowing particles in various colors, including orange, red, and white, creating a sense of dynamic energy and light. The overall effect is ethereal and futuristic.

# **Full Body Scan & Attunement**

# The Full Body Scan

The Full Body Scan is an assessment that looks at over 15 Physical & Vibrational areas to include the 8 Major Organ Systems of the body. There are literally hundreds of possible patterns on this 4-Page form.

As a volunteer today, this is the tool that your assigned student used within the past week or so to look for areas of imbalance within you and provide you with those findings.

They will be sharing a lot of information with you today that you will take home, as well as, use attunement techniques to balance certain areas of your body.

# Vibrational Healing -Attunement?

Attunement is both an energy medicine practice and a consciousness practice. So it is both the shared generation of life energy between two people, promoting health and wellbeing, and also a daily practice of spiritual centering and flow. Attunement opens the gateways of consciousness and energy associated with the endocrine glands.

## **How does this differ from other energy healing methods like reiki?**

Reiki is a channeled (passes through the person to you) rather than a directed energy technique in which you personally generate life energy from your body via the endocrine system.
